Feeding Guidelines:

- Provide feed to the fish 3-4 times a day at the optimal feeding rate.
- Maintain consistency by feeding at the same time and location in the pond each day.
- Check fish growth every two weeks to adjust the feeding rate and quantity as needed.
- Seek advice from Nakshatra Feeds Aqua experts regarding appropriate pellet size and feeding schedules.

Vision & Mission:

Vision

At Nakshatra Feed India PVT Ltd, we aim to be the most trusted partner in aquaculture feed solutions, driving sustainable growth in the seafood industry. Through innovation and ethical practices, we deliver high-quality, nutritionally optimised feeds that enhance farm productivity while protecting the environment.

Mission

Our mission is to provide scientifically formulated, high-performance aqua feeds that ensure optimal growth, better feed conversion, and sustainability. By combining technology, sustainability, and customer focus, we are "Feeding the Future" with superior aqua feeds.

Nakshatra Feed – Secure Tomorrow

- Nutritionally Balanced** - Precision-formulated feeds with optimal proteins, lipids, vitamins, and minerals for faster growth and better feed conversion.
- Sustainable Sourcing** - Responsibly sourced ingredients to minimise environmental impact and support sustainable aquaculture.
- Innovation in Formulation** - Advanced R&D to enhance feed efficiency, disease resistance, and sustainability.
- Customised Solutions** - Tailored feeds to match specific species, water conditions, and farming needs.
- Health & Immunity Boosting** - Enriched with probiotics and functional additives for stronger immunity, better nutrient absorption, and improved survival rates.

Products

- Premium Aquaculture Feeds** - Scientifically formulated for fin-fish, shrimp, and shellfish to ensure optimal growth and sustainability.
- Fish Feeds** - Balanced nutrition for freshwater and marine species like tilapia, trout, and salmon, promoting growth, immunity, and reproduction.
- Shrimp Feeds** - Tailored for all life stages with digestible proteins, antioxidants, and probiotics for gut health and overall wellness.

RAISE – Premium Floating Fish Feed

RAISE is a high-quality floating fish feed, rich in essential proteins, fats, vitamins, and minerals for optimal growth, immunity, and feed conversion. Designed to reduce waste and maintain water quality, it supports sustainable aquaculture. Ideal for IMC, Pangasius, Roopchanda, Tilapia, Catfish, and Exotic Carps, ensuring healthy development and ecosystem preservation.

Floating fish feed typically contains:

Proteins (e.g., fish meal, rice bran, cotton seed cake, soybean meal). Carbohydrates (e.g., wheat flour, corn gluten) Fats & Oils (e.g., fish oil, vegetable oils). Vitamins & Minerals (e.g., vitamin A, calcium, phosphorus) Binders (e.g., gluten, starch) Additives (e.g., antioxidants, preservatives) This blend ensures optimal nutrition, promotes growth, and maintains water quality.

RAISE	2mm	28	5	6	11	20
RAISE	3mm/ 4 mm	28	5	6	11	35
RAISE	3mm/ 4 mm/ 5mm	24	4	6	11	35
RAISE	3mm/ 4 mm/ 5mm	20	3	6	11	35

Premium Sinking Fish feed

Nakshatra – Premium Sinking Fish Feed

Nakshatra is a high-protein sinking feed designed for bottom-feeding fish, ensuring optimal growth, immunity, and feed efficiency. It minimises waste, improves water quality, and supports sustainable aquaculture.

Sinking fish feed typically contains:

Proteins (e.g., fish meal, soybean meal). Carbohydrates (e.g., wheat flour, rice bran) Fats & Oils (e.g., fish oil, vegetable oils) Vitamins & Minerals (e.g., vitamins A, D, calcium) Binders (e.g., gluten, starch) This mix ensures optimal nutrition for bottom-feeding fish and supports healthy growth
